*examples have been changed to protect the innocent

“Gotcha (programming): a counter-intuitive, but documented, behavior in a computer system (as opposed to a bug).”

x.n()

"Returns a numerical approximation of an object 'x' with at least 'prec' bits (or decimal 'digits') of precision."

x.n()

“Returns a numerical approximation of an object ‘x’ with at least ‘prec’ bits (or decimal ‘digits’) of precision.”

```
>>> 2.n(digits=10)
```
